

## How To Revise

### **Firstly, decide where to study:**

The place you choose needs to:

- ♦ Be comfortable
- ♦ Have good light
- ♦ Enough space

### **Ask yourself 'What equipment do I need?'**

The basic revision kit should include:

- ♦ Pens, coloured pencils and a highlighter
- ♦ Paper and a folder
- ♦ Dictionary, text books and revision guides

### **Consider studying with a friend**

Studying with a friend can help to motivate you. It is easier to stay in and work if you have someone with you.

- ♦ Pick someone that you trust and like
- ♦ Decide what you are going to study before you meet
- ♦ Share your study cards, notes and ways of remembering things
- ♦ Stay in touch by phone and e-mail
- ♦ Don't get sidetracked!

You could always set up a study group. The more people involved the more ideas you will come up with between you. Everyone needs to stay committed and focussed on revision during the meetings.
